MYK LATICRETE’s belief in pulling out all the stops when it comes to innovation and a relentless hunger for quality, have seen it partner with global leaders in construction materials and technology.

A true blue success story in the Indian construction and building material industry, in a little over a decade, it has come to be acknowledged as a leader in the domain and credited with pioneering several products that are bringing about a sea change in age old practices and techniques.

A joint venture between the world leader LATICRETE International Inc., USA - a pioneer in building material and construction technology, and the Hyderabad based MYK Group of Companies - a diverse conglomerate with interests in cement, machinery manufacturing, textiles, construction chemicals and industrial fans. MYK LATICRETE is bringing contemporary world standards to the tile and stone installation and maintenance industry in India.

MYK LATICRETE Factory, Perundurai

A first of its kind in India, the unit, designed & engineered by a globally renowned Italian firm, is completely automated to enable greater consistency in product quality due to minimal human intervention.

At MYK LATICRETE, predicting and anticipating future trends has always been our forte. Enabling us to stay ahead of the curve is an advanced research and development center which is equipped to develop innovative products, evaluate tile and stone installation materials as per ANSI, EN, BS and BIS standards, and provide technical solutions for customer needs.

Committed to enhancing customer value through customer education, an exclusive Training Center has also been set up at Hyderabad, where architects, engineers, interior designers, students and dealers learn and get first-hand experience of the usage and application of new products developed by MYK LATICRETE.

We have and will always continue to share a common goal with all our customers and trade partners - to continually strive for the highest quality of construction through ground-breaking innovation.

An exciting product portfolio:

MYK LATICRETE’s world class product range includes adhesives, grouts, stone care, waterproofing, wall putty and plaster, which have set new benchmarks in the industry. The impeccable quality and unmatched efficiency of the installation systems have made them the first choice of smart builders, architects and interior designers.

Specialists in System-based Installation Solutions

At MYK LATICRETE, we believe we are not selling just products but offering you world class solutions to enable better design and faster execution.

Our installation systems are specially innovated for those who love to experiment with new materials and techniques that lend their creativity a unique touch and a standout quality. We will partner you in the quest to push back the boundaries and set fresh benchmarks.

On the following pages, we showcase some of our popular installation systems.

- Facade
- Pools & Water Bodies
- Commercial Tiling
- Residential Flooring
- Industrial Flooring
MYK LATICRETE’s Exterior Façade System is the benchmark of the industry. The installation system comprises of Plaster, Adhesive and Grout to provide a permanent solution, ensuring maximum installation speed and strength for tile, brick and stone facades.

**Advantages**
- High strength
- Impervious to freeze-thaw
- Immune to climate change
- Earthquake shock resistant

with Vitrified/Ceramic/Natural Stones

- Vitrified Tile / CeramicTile / Natural Stones of size up to 2ft X 2ft
- L500 or L 1776 / MYK LATICRETE STELLAR™
- LATICRETE® 111 Crete Filler Powder mixed with LATICRETE® 73 Crete Admix
- LATICRETE® HYDRO BAN™

Properly Prepared Concrete, Backer Board or Masonry Substrates (if substrate requires leveling, use POWER PLAST™)
POOLS, SPA & WATER BODIES SYSTEM

MYK LATICRETE offers the perfect solution for the installation of tiles in pools & water bodies. The system includes Screed, Waterproofing, Tile Adhesive and Grout that are up to the challenge of continuous submerged and wet area applications. Designed to resist chemicals, shock treatment and pH imbalance of water, the MYK LATICRETE system provides flexibility and high strength for these demanding, high performance applications.

Advantages
- High strength & shock resistant
- Resistant to chemicals & pH imbalance of water
- Faster installation

INDUSTRIAL FLOORING SYSTEM

The MYK LATICRETE Industrial Flooring System offers low maintenance, high performance installation for all types of tile and stone in demanding industrial conditions. The system comprises of screed, latex fortified adhesive, specialty adhesive and chemical resistant industrial epoxy grout.

Advantages
- High strength, impact & thermal shock resistant
- Chemical resistant, hygienic and steam cleanable
- Excellent for short “downtime” installations
- Superior load & heavy traffic performance

SCREED

Just imagine. A screed that doesn’t require curing!
This breakthrough innovation is the result of MYK LATICRETE’s determined R&D efforts to come up with a solution for the shortcomings of traditional screed.
MYK LATICRETE’s new age, polymer enhanced screed is engineered cement which, besides ensuring a level, strong base for perfect tile and stone installation, also offers a host of other benefits.

Advantages

- High quality underlayment for long-lasting tile installation.
- Self curing - saves time, costs and enables faster construction
- No shrinking and cracking
- High strength and workability
- External and internal applications
- Resistance to environment and temperature variations
- Highly durable
**Screed**

**Latcrete® 226 Thick Bed Mortar**
A factory prepared blend of raw materials, portland cement and graded aggregates, it is designed for use with Latcrete® 3642 Latex Admix and water to produce high strength thick bed adhesive up to 50 mm for installation of all types of ceramic tiles, vitrified tiles & natural stone. The mixture can be used as interior & exterior cement plaster or as screed for floors & walls.

**Applications:** Interior & exterior floors & walls

**Advantages:**
- Premixed factory blended
- Can be applied from 12 mm to 50 mm in one application
- Two component - to be mixed with L3642 latex concentrate
- High strength, flexible, shock and impact resistant

**Suitable Substrates:** Concrete & Cement Mortar Bed

**Coverage:** Varies by application

**Packaging:** 50 kg bag

**Colour:** Grey & White

**Latcrete® 3642 Latex Concentrate for Thick Bed Mortar**
Latcrete® 3642 is a concentrated Latex Admix which is diluted with water on site and then mixed with Latcrete® 226 Thick Bed Mortar to make cement plasters, renders, coatings, mortar beds and screed. It has greatly improved physical characteristics and can be used in exterior, interior as well as underwater plasters, screeds and renders.

**Advantages:**
- Increased bond and compressive strength
- Water resistant; suitable for submerged applications
- Superior flexibility
- Can be used for repairs and patching of concrete

**Coverage:** Varies by application

**Packaging:** 5 ltr. & 20 ltr. pails

**Note:** L3642 can also be used as primer for dry wall board lining and screeding.

**Compliance:** Meet the following standards
- EN 13813, as CT-C20 F6 B2 SH40
- **VOC:** Very low

---

**Latascreek® 100**
A factory prepared blend of carefully selected specialty raw materials, portland cement and graded fillers, it is designed for use with water and aggregates to produce high strength, water retaining and self curing screed for interior and exterior floor applications. It meets and exceeds the requirements of National and International Standards.

**Advantages:**
- High strength
- Shock and impact resistant
- Water retaining and self curing
- No shrinkage

**Suitable Substrates:**
- Concrete
- Cement Mortar Beds (compressive strength > 25 Mpa)
- Cement Terrazzo

**Coverage:** Coverage will be based on following mix design, the grain size matrix has to be uniformly distributed up to a size of 8 mm. (Minimum thickness: 12 mm; Maximum thickness: 70 mm)

**Packaging:** 25 kg bag

**Colour:** Grey

**Compliance:** Meet the following standards
- EN 13813, as CT-C30 F5 B1 SSH50
- **VOC:** Practically Nil
What happens when the substrate you have waterproofed develops a crack? Water seepage, right? Wrong!
MYK LATICRETE has innovated in this critical area to bring you a game-changing product. The advanced single component waterproofing membrane has the unique ability to bridge cracks in the substrate (up to 3 mm), and requires no other additional accessories for exceptional performance. The under-tile waterproofing membranes are especially recommended for tiled wet areas, washrooms, kitchens, swimming pools and other water bodies.

Advantages

- Unique feature - substrate crack bridging (up to 3mm).
- Highly flexible - to adjust to structural movement.
- Extremely versatile - suitable for various substrates such as concrete, steel, copper etc.

- Easy to apply.
- Load bearing - tiles can be fixed directly on the membrane.
WATERPROOFING

Hydro Ban®

LATICRETE® Hydro Ban® is a thin, bond-bearing waterproofing/crack isolation membrane that does not require the use of fabric in the field, coves or corners. It is a single component, self-curing liquid rubber polymer that forms a flexible, seamless waterproofing membrane. LATICRETE® Hydro Ban® bonds directly to a wide variety of substrates.

Applications:
- Interior and exterior
- Swimming pools, fountains and water bodies
- Shower pans, stalls and tub surrounds
- Industrial, commercial and residential bathrooms and laundries
- Spas and hot tubs
- Kitchens and food processing areas
- Terraces and balconies over unoccupied spaces
- Countertops and facades
- Steam rooms (when used in conjunction with vapour barrier)

Advantages:
- Single component
- No fabric required for joints up to 3mm
- Bonds directly to copper, steel & PVC plumbing fixtures
- Fast drying, allows for flood test in 72 hours

Suitable Substrates:
- Concrete & brick masonry
- Cement mortar beds
- Cement plaster
- Gypsum wallboard
- Exterior glue plywood
- Ceramic tile & stone
- Cement terrazzo
- Cement backer board

*Interior applications only.
**If skim coated with LATICRETE® Latex Thin-set Mortar
***Consult cement backer board manufacturer for specific installation recommendations and to verify acceptability for exterior use.

Coverage: Approx. 225-250 sq. ft. per 20 ltr pail
Packaging: 20 ltr pail

Compliance: Meet the following standards
- ANSI: A118.12
- ANSI: A118.10
- ETAG: 022
- VOC: Very low

9237

LATICRETE® 9237 Waterproofing Membrane

It is a roller-applied, liquid waterproofing membrane for direct use under thin and thick-bed installations of ceramic tile, stone and other finishes. It is recommended for residential and commercial floor and wall installations.

Applications:
- Kitchens, bathrooms, swimming pools, terrace gardens etc.

Advantages:
- Fast and easy to install—applied like paint
- Water cleanable when fresh
- Non-flammable
- Proven history

Suitable substrates:
- Concrete & brick masonry
- Cement mortar beds
- Cement plaster
- Gypsum wallboard
- Exterior grade plywood
- Ceramic tile & stone
- Cement terrazzo
- Cement backer board

Coverage: Approx. 200-225 sq. ft. per 20 ltr pail
Packaging: 5 ltr & 20 ltr pails

Compliance: Meet the following standards
- EN 14891
- ANSI: A118.10
- VOC: Very low

Note: Membrane reinforcing fabric for coves, corners and broad joints is sold separately.

Fabric roll packing: width - 15 cm and length - 18 m to 25 m
TILE ADHESIVES

Across the world, the winds of change are sweeping away traditional methods of installing tiles and stones as these have proven to be incapable of handling modern products and materials.

Rising to meet the challenge is MYK LATICRETE’s range of new age polymer tile adhesives. Far superior to conventional methods, these tile adhesives break the shackles imposed on your creativity by allowing you to experiment with aesthetics. For instance, you can now even think of fixing a marble slab on the ceiling! Finally, today’s construction needs have met their match in MYK LATICRETE adhesives.

Advantages
- Easy to apply
- Higher working time
- Suitable for any substrate
- Wide range for diverse applications
- Enable faster completion of job - savings of time and money
- Expand the scope for aesthetics and quality of interiors
- No curing required
Latex Fortified Thin-Set Adhesives

**111** + **73**

**Crete Filler Powder** + **Latex Admix**

**LATICRETE® 111 CRETE FILLER POWDER**

LATICRETE® 111 Crete Filler Powder is a factory prepared blend of carefully selected raw materials, Portland cement and graded aggregates. It is designed for use with LATICRETE® 73 Crete Admix to produce high strength adhesive for fixing all varieties of small to large format tiles and stones. For very large format & thin tiles/stoness LATICRETE® 4237 Latex admix should be used in place of LATICRETE® 73.

**Applications:** Designed especially for interior & exterior floor & wall installations of all types of tiles & stones.

**Advantages:**
- Exceeds ANSI A 118.4 ET/11 (EGP) & EN 12004 for C2TES 1
- High strength formula & ultimate flexibility
- Ideal for external facades and underwater applications

**Suitable Substrates:**
- Concrete
- Cement Mortar Beds
- Ceramic Tiles and Stones
- Cement Backer Board
- Concrete Masonry
- Cement Plaster
- Brick Masonry
- Cement Terrazzo
- Gypsum Wallboard (interior only)

**Coverage:** Approx. 55-60 sq.ft. per 20 kg bag using a 1/4” x 3/16” (6mmx6mm) notch trowel for a bed of 3mm.

**Packaging:** 20 kg bag  Colour: Grey & White

**Compliance:** Meet the following standards
- ANSI A 118.4 ET/11 (EGP), EN 12004 or ISO 13007 for C2TES1
- IS 15477: TYPE 2 Adhesive • VOC: Practically Nil

---

**LATICRETE® 73 LATEX CRETE ADMIX**

LATICRETE® 73 is a Latex Crete Admix mixed with LATICRETE® 111 Crete Filler Powder / Adhesives to form tile setting beds. Tile setting adhesives made with LATICRETE® 73 Crete Admix provide increased flexibility, stronger bond and compression strength when compared to conventional Portland cement mortars. This increased bond strength is especially vital when installing semi and fully vitrified tiles, quarry tiles, pavers and other ceramic floor and wall tiles used in highly critical areas such as external facades, industrial plants, swimming pools and heavy traffic areas. Also provides longer potlife & working time in hot weather conditions.

**Advantages:**
- High flexibility • High shock and impact resistance • High compressive strength – Exceeds ANSI A 118.4 ET requirement
- Ideal for bonding large format tiles and vitrified tiles.

**Coverage:** Approx. 55-60 sq.ft. per 5 ltrs., mixed with 20 kg bag of LATICRETE® 111 Crete Filler Powder / Adhesive using a 1/4” x 3/16” (6mm x 6mm) square notch trowel for a bed of 3mm.

**Packaging:** 5 ltr. & 20 ltr packs

**Note:** Can be mixed with L305/L307/L290 to enable better flexibility for external use.

**LATICRETE® 73 RAPID CRETE ADMIX**

LATICRETE® 73 Rapid is a specially designed Latex Crete Admix for use with LATICRETE® 111 Crete Filler Powder to make high strength, rapid setting latex fortified thin-set adhesives. Suitable for installation of all types of ceramic and vitrified tiles, industrial tiles, natural stones and agglomerates.
Latex Fortified Thin-Set Adhesives

LATICRETE® 4237 HIGH PERFORMANCE LATEX ADMIX
LATICRETE® 4237 Latex Admix is a specially designed high performance Latex additive for use with LATICRETE® 111 Crete Filter Powder to make high strength thin bed adhesive. It is suitable for installation of all types of ceramic tiles, vitrified tiles, natural stones & agglomerates. It has superior bond strength & flexibility and is also highly resistant to shock & impact. These features make it a premium choice for installation of tile & stone in highly demanding areas such as external facades, industrial floors, high traffic areas etc.

Applications:
Designed for installation of all types of ceramic tiles, vitrified tiles, brick, natural stones and agglomerates, LATICRETE® 4237 Latex admix offers the speed and economy of adhesives with the permanent, water resistant dependability of portland cement.

Advantages:
• Superior bond strength • Flexible and shock & impact resistant • Rated for extra heavy traffic conditions • Proven versatility

Coverage: Approx. 55-60 sq. ft per 5 lbs, mixed with 20 kg bag LATICRETE® 111 Crete Filter Powder / Adhesive using a ¼” x ¾” (6mm x 6mm) square notch trowel for a bed of 3mm.

Packaging: 20 lb. pail

Compliance: Meet the following standards
• ANSI: A118.4 ET, EN 12004 or ISO 13007 for C2TES1 • IS 15477: TYPE 2 Adhesive
• VOC: Very low

Polymer Modified Thin-Set Adhesives

LATICRETE® 254 PLATINUM THIN-SET ADHESIVE
The ultimate one-step, polymer fortified mortar for external facade installation of ceramic tiles, vitrified tiles, stones, quarry tiles, pavers and brick. Superior strength, flexibility to handle structural movements, non-sag property and taking on extreme weather conditions, are among its features. Mixed with water, it has a long open time with unsurpassed adhesion and workability. It is an approved substitute for LATICRETE® 111 powder mixed with LATICRETE® 73 Latex Adhesive.

Applications: Excellent for facades & underwater applications, both interior & exterior areas

Advantages:
• Ultimate bond strength. Can be used on various dry walls directly
• Exceeds ANSI A118.4 ET/11(EGP) & EN 12004 for C2TES1 • Excellent for underwater applications • Single component, just add water

Suitable Substrates:
• Concrete • Concrete Masonry • Cement Mortar Beds • Cement Plaster • Ceramic Tile and Stone • Brick Masonry • Cement Backer Board** • Cement Terrazzo • Exterior Grade Plywood* • Gypsum Wallboard* • Calcium Silicate board *

*Interior use only **Consult the backer board manufacturer’s data sheet for the specific recommendations.

Coverage: Approx. 55-60 sq. ft per 20 kg bag using a ¼” x ¾” (6mm x 6mm) notch trowel for a bed of 3mm.

Packaging: 20 kg bag

Colour: Grey and White

Compliance: Meets the following standards • ANSI: A118.4 ET/11(EGP), EN 12004 or ISO 13007 for C2TES1 • IS 15477: TYPE 2 ADHESIVE • VOC: Very low
Polymer Modified Thin-Set Adhesives

336

XTRABOND FSA 336 THIN-SET ADHESIVE

A multipurpose polymer modified rapid drying (fast setting) thin-set adhesive, suitable for new installations with low down time and quick repairs. Designed especially for moisture sensitive natural stone applications on floor and wall.

Applications:

- Designed specially for interiors, exterior floor & wall installations of all types of ceramic tiles, vitreous tiles, semi-vitreous tiles, glass mosaic tiles, precast terrazzo and natural stones over concrete and a variety of substrates.

Advantages:

- High strength, polymer modified
- Fast setting (Rapid drying)
- Good working time
- Easy to use & part of MBS (Moisture barrier system)
- Exceeds ANSIA 118.4 FT

Coverage: Approx. 55-60 sq.ft. per 20 kg bag with a ¼” x ¼” (6mm x 6mm) square notch trowel for a bed of 3 mm

Packaging: 20 kg & 50 kg bags

Colour: Grey & White

Compliance: Meets the following standards

- ANSIA 118.4 FT
- EN 12004/ISO 13007: C2 FT
- IS 15477: TYPE 2 ADHESIVE
- VOC: Practically Nil

335

LATICRETE® 335 MULTIPURPOSE THIN-SET ADHESIVE

The multipurpose high polymer, modified thin-set mortar for interior and exterior installation of ceramic tiles, stone, quarry tiles, glass mosaic tiles, pavers and brick. LATICRETE® 335 Multipurpose Thin-Set Adhesive is designed to mix with water; has a convenient open time with high adhesion and workability. LATICRETE® 335 Multipurpose Thin-Set Adhesive is compliant with EN and ANSI standards

Applications: Designed for exterior and underwater application, superior bond to concrete, cement renders, screeds.

Advantages:

- Single component
- Exceeds EN 12004/ISO 13007 for C2TE S1 and ANSIA 118.4 ET
- Highly flexible yet strong on bond strength
- Suited for demanding external applications

Suitable Substrates:

- Concrete
- Concrete Masonry
- Cement Mortar Beds
- Cement Plaster
- Ceramic Tile and Stone
- Brick Masonry
- Cement Backer Board*
- Cement Terrazzo
- Gypsum Wallboard*

*Consult the backer board manufacturer’s data sheet for the specific recommendations.

Coverage: Approx. 55 - 60 sft per 20 kg bag with (6mm x 6mm) square notch trowel for a bed of 3 mm

Packaging: 20 kg & 50 kg bags

Colour: Grey & White

Compliance: Meets the following standards

- ANSI: A 118.4 ET, EN 12004/ISO 13007 for C2TES1
- IS 15477: TYPE 2 Adhesive
- VOC: Practically Nil
Polymer Modified Thin-Set Adhesives

LATICRETE® 252 Ag SILVER THIN-SET ADHESIVE

A multipurpose, polymer-modified powder offering vast utility including applications for floors & walls in interior & exterior areas. It is a cementitious thin-set powder to be mixed only with water to install various types of medium & large format tiles & stone on variety of substrates using thin-set method of installation.

Applications: Designed specially for interior & exterior floor & wall installations of all types of ceramic tiles, vitreous tiles, semi-vitreous tiles, glass mosaic tiles, precast terrazzo and natural stones over concrete and a variety of substrates

Advantages:
• Polymer modified thin-set adhesive • Exceeds ANSI A 118.4 ET • Suitable for mosaic, and various tiles & stones • Suitable for various substrates

Suitable Substrates:
• Concrete • Cement Mortar Beds • Ceramic Tile and Stone • Concrete Masonry • Cement Plaster • Brick Masonry • Cement Terrazzo • Gypsum Wall Board*
*Consult the backer board manufacturer’s data sheet for the specific recommendations

Coverage: Approx. 55-60 sq. ft. per 20 kg bag with a 1/4" x 1/4" (6mm x 6mm) square notch trowel for a bed of 3mm.

Packaging: 5 kg, 20 kg and 50 kg bags Colour: Grey and White

Compliance: Meet the following standards • ANSI A 118.4 ET, EN 12004/ISO 13007: C2TE • IS 15477: TYPE 2 Adhesive • VOC: Practically Nil

Slurry Bond Adhesive SBA 20

It is an economical polymer modified cementitious powder that is mixed with water to form freeflowing adhesive slurry for installing ceramic and vitrified tiles on fresh cement-based screed (wet on wet application). It can be used with LATASCREED® 100 engineered cement that is economical and has better fixing system than traditional cement.

Advantages:
• Single component-just add water • Free flowing - eliminates troweling • High strength, polymer modified • Economical

Suitable Substrates:
• Concrete • Cement mortar beds

Coverage: Approximately 60-70 sq. ft. per 20 kg bag for an applied thickness of 2mm

Packaging: 20 kg bag Colour: Grey

Compliance: Meets the following standards
• ANSI A118.4 ET
• EN 12004/ISO 13007: C2TE
• IS 15477: TYPE 2 Adhesive
• VOC: Practically Nil
**Thin-Set Adhesives**

**290**

**LATICRETE® 290 PREMIUM FLOOR AND WALL THIN-SET ADHESIVE**

A high performance polymer based adhesive to be mixed with water or latex for installing medium & large format ceramic tiles, vitrified tiles, marble and stone on floors and walls. Combine with LATICRETE® 73 Crete Admix for improved performance.

**Applications:** Designed for interior floor & wall areas

**Advantages:**
- Dual purpose for floor & wall
- Exceeds ANSI A118.1 TE
- Extended open time
- High bond strength

**Suitable Substrates:**
- Concrete
- Cement mortar beds
- Existing tiling on floor & wall
- Ceramic tile and stone
- Concrete masonry
- Cement plaster
- Brick masonry
- Cement terrazzo

**Coverage:** Approx. 55-60 sq.ft. per 20 kg bag with a ¼” x ¼” (6mm x 6mm) square notch trowel for a bed of 3mm.

**Packaging:** 20 kg and 50 kg bags  
**Colour:** Grey & White

**Compliance:** Meets the following standards
- ANSI: A118.1 TE
- EN 12004/ISO 13007: C1TE
- IS 15477: TYPE 2 Adhesive
- VOC: Practically Nil

---

**307**

**LATICRETE® 307 FLOOR AND WALL THIN-SET ADHESIVE**

It is a smooth and creamy thin-set polymer based adhesive for installing small to medium format ceramic wall and floor tiles, vitrified tiles, small format natural stones in interior areas. (For improved performance and exterior use, fortify with LATICRETE® 73 Crete Admix).

**Applications:** Designed for internal floor & wall applications

**Advantages:**
- Ideal for fixing ceramic tiles, vitrified tiles, natural stones (small format) on floor & wall
- Exceeds ANSI A118.1
- Extended open time
- Smooth & creamy

**Suitable Substrates:**
- Cement mortar beds
- Existing tiles/stones on floor & wall
- Cement plaster
- Brick masonry
- Cement terrazzo

**Coverage:** Approx. 55-60 sq.ft. per 20 kg bag with a ¼” x ¼” (6mm x 6mm) square notch trowel for a bed of 3mm.

**Packaging:** 20 kg and 50 kg bags  
**Colour:** Grey

**Compliance:** Meets the following standards
- ANSI: A118.1
- ISI: TYPE 1 Adhesive
- EN12004/ISO 13007:C1T
- VOC: Practically Nil
Thin-Set Adhesives

305

LATAFIX 305 FLOOR AND WALL THIN-SET ADHESIVE
A factory made bagged cementitious polymer based powder, containing portland cement and silica sand. It can be mixed with water for installing small and medium size ceramic floor tiles in interior areas using the thin-set method of installation.

Applications: Designed for internal floor applications

Advantages:
• Ideal for fixing ceramic tiles on floors • Meets ANSI A 118.1 T • Economy grade • Smooth & creamy

Suitable Substrates:
• Cement mortar beds • Cement plaster • Brick masonry • Cement terrazzo

Coverage: Approx. 55-60 sq. ft. per 20 kg bag with a ¼” x ¼” (6mmx6mm) square notch trowel for a bed of 3mm.

Packaging: 20 kg and 50 kg bags • Colour: Grey

Compliance: Meets the following standards
• ANSI A 118.1 T • IS 15477: TYPE 1 Adhesive
• EN 12004/ISO 13007: C1T • VOC: Practically Nil

Epoxy Adhesives

300

LATAPoxy® 300 EPOXY ADHESIVE
It is a high strength 100% solid epoxy adhesive, highly suitable for chemical resistant installation of all types of tiles/stones including metal tiles, agglomerates, brick and pavers on internal floors of food processing plants, commercial plants, commercial kitchens and beverage plants. Ideal for installing moisture sensitive marbles, it can be used on all metals, including copper.

Applications: For heavy duty commercial chemical resistant installations in food processing areas, commercial kitchens, restaurants, etc. Also use LATAPoxy® 300 Epoxy Adhesive to install all types of ceramic tiles, marble and natural stone over post-tensioned and precast floor systems. Also recommended for rubber flooring and wood block floors. For the installation of green marble, white marble and agglomerate marbles that have a tendency to stain, darken, or warp when installed with water based installation materials.

Advantages:
• Ideal for fixing tiles. can be used over metal substrate • Superior bond strength • Fast setting

Suitable Substrates:
• Resin-backed tiles • Mosaics • Stone • Agglomerates • Metal tiles / Substrates, All drywall boards

Coverage: Varies in accordance with the size and type of the tile and stone installed.

Packaging: 5 kg pallet. Factory proportioned unit consisting of three conveniently packed components - Hardener, Resin (Part A & Part B) and Filler Powder (Part C).

Colour: Grey & White

Compliance: Meets the following standards • Conforms to EN 12004 and ISO 13007 with a R2 T classification • ANSI A 118.3 • VOC: Very low
Epoxy Adhesives

270

LATAPoxy® 270 EPOXY ADHESIVE
It is a versatile, high strength adhesive for installation of tiles or stone and many kinds of plastics and metals on different substrates. It is specially formulated for fixing stone veneers. LATAPoxy® 270 Epoxy Adhesive meets and exceeds the requirements of international standards.

Applications:
For the installation of stone veneers, small format tiles and stones (size up to 300mm x 300mm), plastics, metals and thin stone on various surfaces. Applications include: Interior and exterior walls, floors and ceilings, new construction and renovation projects, residential or commercial applications.

Advantages:
• Ideal for stone veneers and resin agglomerate tiles • Very high bond strength • Shock & impact resistant • Versatile • For interior and exterior areas

Suitable Substrates:
• Concrete • Wood • Ceramic Tiles & Stones • Backer Board • Concrete Masonry • Cement Plaster • Plywood • Cement Terrazzo • Gypsum Wallboard (interior only) • Plastics, FRP • Metals • Glass

Coverage: Approx. 10 sq.ft. per 1 kg pack when applied on the substrate and also on the FRP sheet with flat side of trowel.

Packaging: 1 kg and 5 kg pails
Factory proportioned unit consisting of two conveniently packed components - Hardener, Resin (Part A and Part B), Filler Powder (Part C) is available separately.

For Stoneer applications: Only Part A and Part B are required.
For all other applications: Part A, B and C are required. Colour: Off White

Compliance: Meets the following standards
• Conforms to EN 12004 and ISO 13007 with a R2 T Classification • ANSI A 118.3
• VOC: Very low

210

LATAPoxy® 210 MODIFIED EPOXY ADHESIVE
It is a versatile high strength adhesive designed for installation of ceramic tiles over structurally sound, clean surfaces such as concrete, cement mortar beds, exterior grade plywood, steel & vinyl tiles. LATAPoxy® 210 Modified Epoxy Adhesive is highly suited for high traffic commercial installations where materials must resist physical abuse, shock and light chemicals.

Applications: For commercial and residential installations of ceramic tile and stone over various surfaces such as concrete, metal, plywood etc.

Advantages: • High bond strength • Economical • Can be used on various substrates • Weather & shock resistant

Suitable Substrates:
• Exterior grade plywood • Concrete • Cement mortar beds • Steel • Vinyl tile • All drywall boards

Coverage: Varies in accordance with the size and type of tile or stone installed.

Packaging: 15 kg pail
Factory proportioned unit consisting of three conveniently packed components - Hardener, Resin (Part A & Part B) and Filler Powder (Part C).

Colour: Grey & White

Compliance: Meets the following standards
• Conforms to EN 12004 and ISO 13007 with a R2 T Classification • ANSI: 118.3
• VOC: Very low
Spot Bonding Adhesive

LATAPoxy® 310 EPOXY CHEMICAL ANCHOR

LATAPoxy® 310 Epoxy Adhesive is a two component non-sag high strength epoxy chemical anchor ideally suited for spot fixing or attaching marble or stone slabs on walls and for installing marble tiles or heavy tiles in ceilings. LATAPoxy® 310 is ideal for external facades.

Advantages:
- Non-staining
- Withstands shock and vibration
- Durable permanent bond
- Ideal for use on dry or damp surfaces
- Can be used for fabricating marble and stone assemblies
- No clamps/mechanical anchor needed

Packaging:
1 kg and 10 kg pails

Colour: Off white when mixed. May be coloured with dry pigments.

Compliance: Meets the following standards
- Conforms to ANSI 118.3 EN 12004 and ISO 13007 with a R2 T classification
- VOC: Very low

Speciality Adhesives

PUA 212

MYKLATICRETE PUA 212

It is a two component, modified Polyurethane Adhesive designed for the installation of ceramic tile, vitrified tile, metal tile, glass tile, agglomerates, glass mosaic tile and natural stone on any substrate. It is highly elastic, thixotropic and suitable to lay water sensitive tiles & stones on highly expandable, deformable, absorbent and non-absorbent substrates.

Application:
Designed especially for interior and exterior floor and wall installations of all types of ceramic tile, vitreous, semi-vitreous tile, glass mosaic tiles, precast terrazzo, engineered stone, metal tiles and natural stones over concrete and on a variety of substrates including metal substrates and drywall boards.

Advantages:
- Highly flexible & superior bond strength
- Suitable for all the substrates including metal
- Good for vertical applications
- Ideal for agglomerates & moisture sensitive tiles/stones

Suitable Substrates:
- Concrete - VDF, Tremix and MIVON
- Concrete masonry & brick masonry
- Cement mortar beds & plaster
- Metal floors and walls
- Tile and stone
- Wood & plywood
- Cement backer board* & Gypsum board*
- Cement terrazzo
- Engineered stones & marbles
- Epoxy or PU resin based substrates
- Rubber, PVC and Linoleum substrates

*Consult the backer board manufacturer's data sheet for the specific recommendations and load bearing capacity of specific board intended for use.

Coverage: 15 to 17 sq.ft per pack of 8 kg with 1/4" x 1/4" (6mm x 6mm) square notch trowel for a bed of 3mm.

Coverage will vary depending on trowel notch size, type and size of tile and substrate smoothness and evenness.

Packaging: 8 kg Pail (Part A: 300 g Part B: 7.7 kg)

Factory proportioned unit consisting of two conveniently packed components - Hardener, Resin (Part A and Part B)

Colour: Off White

Compliance: EN 12004/ISO 13007: R2 T

VOC: Very low
Speciality Adhesives

DWA 215

LATICRETE® DWA 215

It is a modified Polyurethane Adhesive designed for the installation of glass mosaic tile, ceramic tile, vitrified tile and natural stone on most drywall boards and clean dry cement based surfaces. LATICRETE® DWA 215 is a factory made pail consisting of pre-blended single component adhesive which is ready to use.

Applications:

For commercial and residential installations of ceramic tile, vitrified tile and natural stone over most drywall boards and clean cement based surfaces. Used where installations must resist physical abuse, shock, and mild chemicals. (Interior & Exterior)

Advantages:

• Single component / Ready to use  • High bond strength  • No on-site mixing  • Fast installation - Saves time  • Economical  • Can be used on various dry wall boards

Suitable Substrates:

• Concrete*  • Cement mortar beds*  • Plywood  • Gypsum wallboard  • Calcium silicate board  • Biscuit panel board  • Concrete masonry*  • Cement plaster*  • AAC block masonry*  • Cement terrazzo*  • Cement backerboard**  • Existing ceramic tile  • Other resilient tile and stone

* All cement based surfaces should have been cured as per standard practices and shall be dry for tiling.

**Consult cement backer board manufacturer for specific installation recommendations and to verify acceptability for exterior use.

Note: Not for use on metal & plastic substrates and metal tiles.

Coverage: Approx. 58 sq.ft. per 20 kg/unit with a ¼" x ¼" (6mm x 6mm) square notched trowel

Packaging: 10 kg & 20 kg pail

Colour: Off White

Compliance: Meets the following standards

• ANSI: A 118.4 & ANSI: A 136.1
• EN: D2TE
• VOC: Very low

AAC Block

AAC BLOCK ADHESIVE

It is a factory prepared blend of carefully selected raw materials, portland cement and graded aggregates and polymers. Designed for use with water to produce high strength thixotropic mortar, for laying aerated light weight concrete, fly ash bricks, cement hollow blocks, cellular concrete blocks or smoothing over the block work surface in layers of upto 12mm thickness, that meet and exceed the requirements of National and International Standards.

Applications: For interior and exterior use for preparing thin bed block mortar for ALC and cellular concrete blocks.

Advantages: • Long working time  • No curing required after block work is done  • Improved adhesion between two blocks  • Fast & economical

Suitable Substrates: • Concrete blocks  • Cement mortar blocks/bricks  • Concrete hollow blocks  • Aerated light weight blocks  • Cellular concrete blocks  • Fly ash bricks

Coverage: Approximately 300 sq.ft. per 50 kg bag when used at 2mm bed thickness. Coverage is based on smoothness and evenness of the substrate, size of blocks used and the thickness of mortar used. A general guide line for coverage of mortar is given when used with 25% water added to powder.

Note: Coverage is based on the block size of 600mm X 200mm X 100mm

Packaging: 20 kg & 50 kg bags

Colour: Grey

Compliance: Meets the following standards • ANSI: A 118.1 T  • EN: C1TE  • ASTM C1660
• ISI: Type 1 Adhesive  • VOC: Practically Nil
MYK LATICRETE SUPER SET is a macromolecule based polymer concentrate liquid to be mixed with water and used with cement for installing ceramic tile, vitrified tile and natural stone using the traditional cement slurry method of installation. It is very economical and works as a great enhancer for cement slurry bonding with tiles and stones removing the need for water curing.

**Application:**
Can be used for interior and exterior applications on floors over concrete and mortar beds

**Advantages:**
- Purpose - for enhancing traditional cement slurry
- Easy to use - Liquid form easily dispersible in water
- Polymer based - High adhesion, more open time
- Better performance - Compared to traditional system of only cement slurry tiling
- Special Polymers - Self curing of cement slurry
- Economical - Highly economical to use with many benefits
- Can be used with Grey Cement or White Cement

**Suitable Substrates:**
- Traditional Wet on Wet system - Cement Mortar Beds

**Mixing Ratio:** Only 300ml to be mixed in water and used with 50 kg bag of cement

**Packaging:** 300ml

**Colour:** White liquid
MYK LATICRETE PRODUCT RANGE
INDIAN GREEN BUILDING COUNCIL
LEED NC Green Building Rating System v.1

As part of green movement, MYK LATICRETE has been advocating and promoting their product range to ensure BREATHE EASY for all end users of their products. MYK LATICRETE’s products Adhesives, Grouts, Stone care, Waterproofing, Wall Putty used on the interior of the building (defined as inside of the weather proofing system & applied on site) comply with the requirements of reference standard.

MYK LATICRETE can assist architects / designers in a number of key areas to accumulate potential LEED credits towards project certification by providing required VOC test certificates.
Not using grouts when laying tiles can lead to problems ranging from chipped corners, water seepage, staining to even breeding of fungus and the tiles debonding or falling off.

Extensive studies and in-depth research by some of the most innovative minds in the business have seen the emergence of a new breed of grout that makes all others obsolete. The award-winning range is a perfect blend of aesthetics and performance and has become the new yardstick of quality.

Advantages

- Stainfree
- Acid/chemical resistant
- Non-cracking/powdering
- Anti-fungal and anti-bacteria
- Easy application
- Available in a variety of shades
Stainfree Grout

**STELLAR™**

**MYKLATICRETE STELLAR™ GROUT**

It is a single component, high performance modified joint filling grout, which offers excellent colour uniformity, durability, stain protection, and beautiful grout joints in an easy-to-use, non-sag formula, with no hassle of mixing two packs or any other liquids like water or latex liquid.

**Application**

STELLAR™ Grout is best suited for internal & external tile joints grouting of residential / commercial installations where materials must resist physical abuse, shock & chemical attack. Excellent for external swimming pool & water bodies.

**Advantages**

- Single Component
- Suitable for joints of 1.5 mm to 12 mm
- Non-sag formula for floors and walls
- Designed for exterior use

**Coverage:** Varies with tile size and grout width

**Packaging:** 1/5th unit - 1 kg & 1 unit - 5 kg pallets

**Colour:** Available in 10 colours

---

**SpectraLOCK®**

**SpectraLOCK® Pro Premium Grout**

LATICRETE® SpectraLOCK® Pro Premium Grout is a patented, high performance grout which offers excellent colour uniformity, durability, stain protection, and beautiful flush grout joints in an easy-to-use, non-sag formula.

**Applications:**

- Residential & institutional kitchens
- Cafeterias & food joints
- Wash rooms & clean rooms
- Swimming pools, spa & sauna
- Hospitals, operation theatres, laboratories
- Schools & education institutes
- Podium slabs, drive ways & atriums
- Terraces & balconies

**Advantages:**

- Easy to install & clean
- Full flush joints
- Doesn't retain dirt & dust
- Maximum non-sag performance

**Coverage:** Varies with tile size and grout width

**Packaging:** 1/5th unit - 1 kg & 1 unit - 5 kg pallets

**Colour:** Available in 20 attractive colours

Factory proportioned unit consisting of three conveniently packed components - Hardener, Resin (Part A and Part B) and Coloured Filler Powder (Part C)

**Compliance:** Meets the following standards

- ANSI: A 118.3
- EN 13888: RG2
- VOC: Very low
Stainfree Grout

LATAPoxy® SP-100 Stainfree Grout for Floor & Wall

LATAPoxy® SP-100 Stainfree Grout for Floor & Wall is a stainfree, colour-fast, chemical resistant, 100% solid epoxy grout suitable for ceramic tiles, vitrified tiles, marble and stone, especially in stain prone areas such as kitchens and washrooms (residential and commercial installations).

Applications: Kitchens, bathrooms, swimming pools, fountains, water bodies, hospitals, operation theatres, sterilization rooms, restaurants, cafeterias, light industrial applications and high traffic areas.

Advantages:
- 100% stainfree
- Strong and durable
- Chemical and temperature resistant
- Anti bacterial and anti fungal

Coverage: Varies with tile size and grout width

Packaging: 1/5th unit - 1 kg & 1 unit - 5 kg pails

Factory proportioned unit consisting of three conveniently packed components - Hardener, Resin (Part A and Part B) and Coloured Filler Powder (Part C).

Colour: Available in a range of more than 36 colours

Compliance: Meets the following standards
- ANSI: A 118.3
- EN 13888: RG2
- VOC: Very low

Cementitious Grout

LATICRETE® 600 SERIES UNSANDED GROUT

A carefully prepared blend of portland cement, graded aggregates, polymer fortifiers and colour-fast pigments. It is designed for joint width 1mm to 3mm, for porous & absorbent type tiles, non-vitreous clay tiles, and marble & glazed wall tiles. Suitable for internal and external applications.

Applications:
- Residential, commercial, external facades

Advantages:
- For tile joints 1 - 3mm
- Uniform colour
- Hard and durable
- Economical

Mixing Ratio: Use approx. 400 ml of water or LATICRETE® 1776 Grout Admix Plus for 1 kg of LATICRETE® 600 Series Unsanded Grout.

Coverage: Varies with tile size and grout width

Packaging: 500g, 1 kg and 10 kg bags

Colour: Available in a range of more than 36 colours

Compliance: Meets the following standards
- ANSI: A 118.6
- EN 13888: CG1
- VOC: Very low
Cementitious Grout

LATICRETE® 500 SERIES Sanded Grout
LATICRETE® 500 Series Sanded Grout is made of polymer blended portland cement, graded aggregates, fortifiers and colour-fast pigments, it provides a tile joint that is strong, hard and durable. Designed for joint width of 3mm to 12mm for non-absorbent and vitreous tiles, it is suitable for interior and exterior use.

Applications:
Residential, commercial, external facades

Advantages:
• For tile joints 3-12mm • Uniform colour • Hard and durable • Economical

Mixing Ratio: Use approx. 2ltr of LATICRETE® 1776 Grout Admix Plus for 10 kg of 500 Series Sanded Grout.

Coverage: Varies with tile size and grout width

Packaging: 10kg bag

Colour: Available in a range of more than 36 colours

Compliance: Meets the following standards
• ANSI: A 118.6
• EN 13888: CG1
• VOC: Very low

Grout Admix

LATICRETE® 1776 GROUT ADMIX PLUS
LATICRETE® 1776 Grout Admix Plus is specially designed Latex Admix to be used with Sanded & Unsanded Grout.

Applications:
It improves the performance of portland cement grouts for all types of ceramic tile, brick, marble, natural stone and agglomerate stone installations.

Advantages:
• Colour-fastness
• Flexibility
• Compressive strength
• Shock and chemical resistance
• Reduces water absorption
• Easy to clean

Coverage: Varies by application.
Packaging: 200 ml, 400 ml, 5ltr and 20ltr pails
Compliance: • VOC: Very low
Speciality Grout

Dazzle™

LATAPoxy® Dazzle™ Grout for Floor & Wall
LATAPoxy® Dazzle™ Grout for Floor & Wall is an epoxy grout specifically designed to enhance aesthetics and performance. It is suitable for use with ceramic tiles, vitrified tiles, glass mosaic tiles, designer tiles and natural stone.

Applications: • Restaurants • Hotels • Kitchens • Bathrooms • Lobbies • Swimming Pools • Showrooms

Advantages: • Good aesthetic appeal • Stainfree • Strong & durable • Chemical & temperature resistant

Coverage: Varies with tile size and grout width

Packaging: Net Weight: 1/4 unit (1.25 kg); 1 unit (5 kg) pails

Factory proportioned kit consisting of three conveniently packed components - Hardener, Resin (Part A and Part B) and Dazzle Coloured Filler Powder (Part C).

Colour: Available in 10 colours and 3 finishes - Gold, Silver and Copper

Compliance: Meets the following standards
• ANSI: A 118.3
• EN 13888: RG2
• VOC: Very low

2000

LATAPoxy® 2000 Industrial Epoxy Grout

Three part, 100% solid epoxy grout specifically formulated for maximum chemical and high temperature resistance. It is recommended for extreme industrial and commercial applications such as dairies, food processing units, commercial kitchens, breweries, beverage plants, pharmaceuticals, and meat packaging plants.

Applications: Industrial food processing plants, beverage plants, battery plants and environments requiring high temperature and chemical resistance.

Advantages:
• Heavy duty industrial grout • Superior chemical & heat resistance • Water cleanable & fast curing • Highly resistant to bacteria attack

Coverage: Varies with tile size and grout width

Packaging: #2 unit (10 kg) pail

Factory proportioned unit consisting of three conveniently packed components - Hardener, Resin (Part A and Part B) and Coloured Filler Powder (Part C).

Colour: Black and Grey

Compliance: Meets the following standards
• ANSI: A 118.3
• EN 13888: RG2
• VOC: Very low

**NOTE:**
1. Quantities shown are approximate and are given for estimating purposes only. Actual job site coverages may vary.
2. It is always good practice when calculating coverage to allow for 10-15% additional material for wastage and spillage.
**STONE CARE PRODUCTS**

Spa treatment for stone and tile floors

Just like how a refreshing spa experience rejuvenates, revives and helps us look our best, stone and tile floors too, thrive when lavished with such care.

MYK LATICRETE, the leader in the stone and tile installation industry, presents a world class range of innovative products – Sealers, Enhancers, Cleaners - that augment the appearance of interiors and exteriors while adding years to the life of stone and tile.

**Sealers**

Natural stone is highly porous in nature, which allows water and oil to seep in, leading to stains and discolouration. It is also prone to deposits of soil, rust, stains, moss and efflorescence.

To overcome this problem, MYK LATICRETE Sealers are ‘impregnated’ into the stone to form an invisible barrier that is resistant to moisture and stains. Since this is not a surface coating, the natural look of the stone is not altered.

**Enhancers**

To augment the colour and gloss of all natural stone surfaces, MYK LATICRETE Enhancers are unique products that add to the aesthetics of internal or external space even as they leave behind a stain-free, water & weather-resistant surface.

**Cleaners**

To help maintain floors and walls in pristine condition, MYK LATICRETE Cleaners come in handy. Fast acting and easy to use, these products ensure that stones and tiles are dirt and stain-free and at their sparkling best.
Sealers

MaxiSeal plus

MaxiSeal plus is a nano technology based impregnating sealer designed for the protection of all highly porous tile/stone and grout surfaces. This product imparts oleophobic properties and is formulated to be highly resistant to oil, water, alkalis, acid staining and freeze-thaw damages. It penetrates into the surface and forms an invisible barrier by allowing vapour to escape. It keeps the natural colour of tile & stone intact. All surfaces treated with MaxiSeal plus are harder and less slippery. It is ideal for interior as well as exterior applications and recommended for granite, marble, sandstone, porous slate, brick and sanded grout.

Applications:
• For interior & exterior applications on tile and stone surfaces

Advantages:
• Nano-impregnating technology • High resistance to oil stains • Weather resistant • Superior coverage • Economical • Easy to use • U.V. resistant • Low VOC after 72hrs application

Coverage: 25 - 400 sq.ft. per litre depending on porosity of the substrate.

Packaging: 1, 5 ltrs, cans & 20 ltrs, pails

Field Test: It is highly recommended to perform field test to understand the absorption nature of the substrate. This will help maximize the performance and efficiency of MaxiSeal plus.

MaxiSeal aqua

MaxiSeal aqua is nano technology based impregnating sealer with water as a carrier designed for the protection of all highly porous tile/stone and grout surfaces. This product imparts oleophobic properties, and is highly resistant to oil, water, alkalis and acid staining damages. It penetrates into the surface and forms an invisible barrier by allowing vapour to escape.

It keeps the natural colour of tile & stone intact. All surfaces treated with MaxiSeal aqua are harder and less slippery. It is ideal for interior as well as exterior application and recommended for grout, ceramic tiles, porcelain tiles, granite, marble, lime stone and brick.

Applications: • For interior & exterior applications on tile and stone surfaces

Advantages:
• Nano-impregnating technology • High resistance to oil stains • Weather resistant • Superior coverage • Economical • Easy to use • U.V. resistant • Low VOC

Coverage: 25 - 400 sq.ft. per litre depending on porosity of the substrate.

Packaging: 1, 5 ltrs, cans & 20 ltrs, pails

Field Test:
It is highly recommended to perform field test to understand the absorption nature of the substrate. This will help maximize the performance and efficiency of MaxiSeal aqua.
**Sealers**

MaxiSeal

MaxiSeal is a nano technology based impregnating sealer designed for the protection of all medium to dense porous tile/stone and grout surfaces. This product is formulated for resistance against water, alkalis, acid staining and freeze-thaw damages. It penetrates into the surface and forms an invisible barrier by allowing vapour to escape. It keeps the natural colour of tile & stone intact. All surfaces treated with MaxiSeal are harder and less slippery. It is ideal for interior as well as exterior applications and recommended for grout, brick & masonry surfaces, granite, marble, ceramic and porcelain tiles.

**Applications:**
- For interior & exterior applications on tile and stone surfaces

**Advantages:**
- Nano-impregnating technology
- Weather resistant
- Superior coverage
- Economical
- Easy to use
- U/V resistant
- Low VOC after 72 hrs of application

**Coverage:** 25 - 500 sq.ft. per litre depending on porosity of the substrate.

**Packaging:** 1, 5 ltrs. cans & 20 ltrs. pails

**Field Test:**
It is highly recommended to perform field test to understand the absorption nature of the substrate. This will help maximize the performance and efficiency of MaxiSeal.
Colour • Gloss Enhancers

Preserva plus

Preserva plus is a single component solution for enhancing and sealing the natural colour of flamed, tumbled and textured stone surfaces. Preserva plus functions on the surface of the substrates. It penetrates into the surface and forms an invisible barrier by allowing vapour to escape. It enriches and gives a wet look to the natural color of the stone and tile.

It protects tile/stone surfaces against oil based stains. All surfaces treated with Preserva plus are harder and less slippery. It is ideal for interior as well as exterior application and recommended for Flamed Granite, Flamed Limestone, Tumbled Marble, Textured Natural Stone.

Applications: • For interior & exterior applications on textured natural stone surfaces.

Advantages:
• Nano-impregnating technology • Weather resistant • Superior coverage • Economical • Easy to use • U.V. resistant • Low VOC after 72 hrs of application

Coverage: 25 - 400 sq.ft. per litre depending on porosity of the substrate.

Packaging: 1, 5 ltrs. cans & 20 ltrs. pails

Field Test:
It is highly recommended to perform field test to understand the absorption nature of the substrate. This will help maximize the performance and efficiency of Preserva plus.

Preserva

Preserva enhances the natural colour of flamed, tumbled and textured stone surfaces. When combined with our range of Sealers, it preserves and enhances the original beauty of the unsealed natural stone. Preserva functions on surface of the substrates. It penetrates into the surface and forms an invisible barrier by allowing vapour to escape. It enriches and gives a wet look to the natural colour of the stone and tile. All surfaces treated with Preserva are harder and less slippery. It is ideal for interior as well as exterior applications and recommended for Flamed Granite, Flamed Limestone, Tumbled Marble and Textured Natural Stone.

Applications:
• For interior & exterior applications on textured natural stone surfaces.

Advantages:
• Nano-impregnating technology • Weather resistant • Superior coverage • Economical • Easy to use • U.V. resistant • Low VOC after 72 hrs of application

Coverage: 25 - 400 sq.ft. per litre depending on porosity of the substrate.

Packaging: 1, 5 ltrs. cans & 20 ltrs. pails

Field Test:
It is highly recommended to perform field test to understand the absorption nature of the substrate. This will help maximize the performance and efficiency of Preserva.
Cleaners

Clenza AQ

Clenza AQ is a concentrate to be diluted with potable water as per need to clean all surfaces. It is a non-toxic cleaner which can be used for daily maintenance and to remove tough stains.

This neutral pH cleaner is most suitable for cleaning marble and other calcium based stones. Clenza AQ is also recommended for regular maintenance of sealed stone surfaces. It is effective and easy to use.

Applications:
- Interior & exterior areas
- Kitchens
- Bathrooms
- Counter Tops

Advantages:
- Non-acidic
- Non-corrosive
- Bio-degradable

Coverage: 250 – 2500 sq.ft, per litre depending on porosity of the substrate, dilution and stains

Packaging: 1.5 ltrs. cans & 20 ltrs. pails

Clenza EG

Clenza EG is a non-acid cleaner to remove epoxy grout haze from tile, concrete and stone surfaces. The unique non-acidic formula makes it safe to be used on marble and other calcium based stones. Clenza EG does not leave behind residue or any harmful deposits. In addition to epoxy, Clenza EG will also remove acrylics, gums, varnishes, lacquers etc. Clenza EG is fast acting and easy to use.

Applications:
- Ceramic tiles
- Vitrified tiles
- Natural stone
- Concrete

Advantages:
- Fast acting
- Non-acidic
- Non-corrosive
- Easy to use

Coverage: 15 - 50 sq.ft. per litre depending on porosity of the substrate.

Packaging: 1.5 ltrs. cans & 20 ltrs. pails
Cleaners

ClenzaGA

Clenza GA is an acidic cleaner which can be used to remove grout and adhesive haze, hard water deposit and other hard stains from tile and stone surfaces. Clenza GA is water soluble and can be used at desired concentration levels for stain removal. Clenza GA can be used in interior as well as exterior applications.

Applications:
• Ceramic tiles • Vitrified tiles • Natural stone* • Concrete* • Masonry*

*Acidic cleaners may leave a mark on the surface and also may damage,

Advantages:
• Fast acting
• Non-corrosive
• Easy to use
• Economical

Coverage: 15 - 50 sq.ft. per litre depending on porosity of the substrate, degree of stains and dilution

Packaging: 1.5 ltrs, cans & 20 ltrs, pails

ClenzaEF

Clenza EF is an acidic cleaner which can be used to remove efflorescence from tile and stone surfaces. Clenza EF is water soluble and can be used in both interior and exterior applications.

Applications:
• Ceramic tiles • Vitrified tiles • Natural stone* • Concrete* • Quarry tile

*Acidic cleaners may leave a mark on the surface and also may damage.

Advantages:
• Fast acting
• Easy to use
• Low odour

Coverage: 15 - 50 sq.ft. per litre depending on porosity of the substrate, degree of efflorescence, stains and dilution

Packaging: 1.5 ltrs, cans & 20 ltrs, pails
Cleaners

**ClenzaMC**

Clenza MC is a non-toxic cleaner which can be used for daily maintenance of marble flooring. The neutral pH cleaner is most suitable for cleaning marbles and other calcium based stones. Clenza MC is also recommended for regular maintenance of sealed stone surfaces.

**Applications:**
- All types of marble surfaces

**Advantages:**
- Interior & exterior use
- Economical
- Fast acting
- Easy to use

**Coverage:** 50 - 150 sq.ft. per litre depending on porosity of the substrate.

**Packaging:** 1, 5 ltrs. cans & 20 ltrs. pails

Tile Cleaner

**CLENZA TC**

CLENZA TC is a fast acting acid based cleaner for regular cleaning of dirt and stains on tile surfaces. CLENZA TC is designed for daily maintenance of tiles. It is ideal for interior and exterior use.

**Applications:**
- Unglazed Ceramic Tile • Glazed Ceramic Tile • Vitrified Tile
- Porcelain Tile • Glass Tile

**Advantages:**
- Cleans dirt and removes stains
- Easy to use
- Fast acting

**Coverage:** Depends on porosity of the substrate.

**Packaging:** 1 ltr can
Sealer

**LATICRETE® 190 Sealer**

LATICRETE® 190 Sealer is a nano technology based penetrating sealer which forms an invisible water repellent coating. Applied on natural stone, marble, brick, limestone and mortar joints, it will seal the surface to reduce staining and water absorption. It will not change the colour of the stone and ceramic tile.

**Uses:**
- Interior and exterior sealer to protect installations
- Seals mortar and plaster
- Reduces the effect of efflorescence
- Can be used as a grout release by treating ceramic tile before the application of grout
- Repels water and rain

**Applications:**
- Residential & commercial, ideal for soft and natural stone, marble and porous tiles.

**Advantages:**
- Weather resistance - protects stone, brick and tile
- Easy to apply - no special tools required
- Water-based, non-flammable
- VOC: Very low

**Coverage:** Approximately 75 sq. ft. per litre.

**Packaging:** 1.5 ltrs, cans & 20 ltrs, pails.
LATAFINISH® WALL PUTTY

LATAFINISH® Wall Putty from MYK LATICRETE not only strengthens walls but also protects expensive paint from dampness and moisture. Vastly superior to any other wall putty available in the market today, it serves as the best sub-surface for all types of interior and exterior paint applications. Its greater adhesive properties enable perfect bonding with the base and paint, providing a bright, even finished surface that effectively eliminates the need for primer. Benefitting you with considerable savings of time and money.
LATAFINISH® Wall Putty

**LATAFINISH® Wall Putty (FINE FINISH)**

LATAFINISH® Wall Putty is a unique formulation of white cement and high performance chemicals and polymers which can be applied on damp as well as dry surfaces.

**Advantages:**
- White cement based Wall Putty
- White, smooth & glossy finish
- Does not allow paint to flake
- Protects paint from moisture
- Curing is not required
- Ideal for interior & exterior walls

**Coverage:** LATAFINISH® Wall Putty covers approx. 16 to 20 sq. ft. per kg for 2 coats, maintaining a maximum thickness of 1.5 mm on smooth plaster surface.

**Available pack sizes:** 40 kg, 20 kg, 5 kg & 1 kg bags

**Compliance:** • VOC: Very low

---

**LATAFINISH® Wall Putty (COARSE FINISH)**

LATAFINISH® Wall Putty - Coarse Finish is made of white cement, polymers, carefully graded fine aggregates & biocides. It has to be mixed with water at the time of application.

**Advantages:**
- Easy to apply
- Good compressive strength
- Water resistant
- Good tensile strength
- Anti-fungal
- Covers undulations of plastered surfaces

**Coverage:** LATAFINISH® Wall Putty covers approx. 10 to 11 sq.ft. per kg for a 2mm thickness. The coverage depends upon the quality of base surface and surface evenness.

**Packaging:** 40 kg & 20 kg bags

**Compliance:** • VOC: Very low

---

**PRIMER**

**LATAPRIMER (WATER BASED CEMENT PRIMER)**

MYK LATICRETE LATAPRIMER is a premium quality, water-based dispersion containing acrylic polymers and selected surface activation agents, which penetrate deep into the substrate and maximize bond strength. It can be used on a wide range of substrates including Cement based plasters, gypsum based plasters, POP, etc.

**Available in Interior & Exterior grade**

**Interior grade**

**Advantages:**
- Effective in sealing pores in substrate
- Better adhesion to substrate
- Improves coverage saves paint cost

**Dilution:**
- Upto 20% dilution with water

**Coverage:**
- 80 to 100 sq.ft.*

**Packaging:**
- 1, 4 ltrs cans, 10 ltrs & 20 ltrs pails

**Compliance:** • VOC: Very low

*Coverage depending upon the porosity of the substrate

**Exterior grade**

**Advantages:**
- Effective in sealing pores in substrate
- Better adhesion to substrate
- Improves coverage saves paint cost
- Withstands exterior weather conditions

**Dilution:**
- Upto 100% dilution with water

**Coverage:**
- 100 to 120 sq.ft.*

**Packaging:**
- 1, 4 ltrs cans, 10 ltrs & 20 ltrs pails

**Compliance:** • VOC: Very low
MYK LATICRETE’s POWER PLAST™ Ready-Mix Plaster represents the next level of development as it is self curing*. A blend of carefully selected raw materials, Portland cement and graded fillers, POWER PLAST™ is easy to use and offers superior bond, compressive & tensile strength.
PLASTER

POWER PLAST™

POWER PLAST™ Ready Mix Plaster is a polymer modified ready to use plaster made of selected raw materials, Portland cement and graded fillers. Designed for use with water to produce superior strength, it is a water retaining & self curing* plaster that meets and exceeds the requirements of National and International Standards.

Applications: For interior and exterior wall plastering.

Advantages: • Fast & economical • Water retaining & self curing* • Improved bond, compressive & tensile strength • Easy to use • Minimum rebound losses

Suitable Substrates: • Concrete walls & ceilings • Clay brick walls • Concrete hollow brick walls • Cement block walls • AAC Block walls

Coverage: Approx. 4-6 hrs of water are needed for an ideal mix. Adjust the water content depending on the site conditions.

(Coverage depends on the plumb, evenness of wall and mix consistency)
