New age solutions for new age constructions

Adhesives | Grouts | Stone care
Waterproofing | Wall Putty | Plaster
MYK LATICRETE has steadily risen in stature to be acknowledged as a leader in Tile and Stone installation solutions. Our international standard products are a result of continuous innovation as well as rigorous R&D efforts and in-depth understanding of Indian work conditions.

The entire range of products is manufactured at our state-of-the-art facilities at Hyderabad, Sotanala and Perundurai. An advanced R&D Centre empowers us to stay on the cutting edge of innovation, developing new products that fulfill specific needs and meet particular challenges.

“MYK LATICRETE’s goal is to deliver innovative solutions and develop new and eco-friendly products to achieve leadership in the tile and stone installation industry.

We aim at excellence in customer satisfaction and service.”

Murali Yadama
Managing Director
You’ll agree that a beautifully laid stone or tile floor adds immeasurably to the aesthetics and appearance of the interiors. Of course, the floor has a much greater role to play than merely enhancing ‘face value’. It has to be hardworking, hardwearing and also contribute to the overall structural strength of the building.

After extensive studies and R&D efforts, MYK LATICRETE, the leader in innovative tile and stone installation solutions, presents world class products that lay down the new rules for laying floors.

SCREED

Just imagine. A screed that doesn’t require curing!

This breakthrough innovation is the result of MYK LATICRETE’s determined R&D efforts to come up with a solution for the shortcomings of traditional screed.

MYK LATICRETE’s new age, polymer enhanced screed is engineered cement which besides ensuring a level, strong base for perfect tile and stone installation, offers a host of benefits.

WATERPROOFING

What happens when the substrate you have waterproofed develops a crack? Water seepage, right? Wrong!

MYK LATICRETE has innovated in this critical area to bring you a game-changing product. The advanced single component waterproofing membrane has the unique ability to bridge cracks in the substrate (up to 3 mm), and requires no other additional accessories for exceptional performance. The under-tile waterproofing membranes are especially recommended for tiled wet areas, washrooms, kitchens, swimming pools and other water bodies.

TILE ADHESIVES

Across the world, the winds of change are sweeping away traditional methods of installing tiles and stones as these have proven to be incapable of handling modern products and materials.

Rising to meet the challenge is MYK LATICRETE’s range of new age polymer tile adhesives. Far superior to conventional methods, these tile adhesives break the shackles imposed on your creativity by allowing you to experiment with aesthetics. For instance, you can now even think of fixing a marble slab on the ceiling! Finally, today’s construction needs have met their match in MYK LATICRETE adhesives.

GROUTS

Not using grouts when laying tiles can lead to problems ranging from chipped corners, water seepage, staining, to even breeding of fungus and the tiles debonding or falling off.

Extensive studies and in-depth research by some of the most innovative minds in the business have seen the emergence of a new breed of grout that makes all others obsolete. The award-winning range is a perfect blend of aesthetics and performance and has become the new yardstick of quality.

STONE CARE PRODUCTS

Just like how a refreshing spa experience rejuvenates, revives and helps us look our best, stone and tile floors too, thrive when lavished with such care.

MYK LATICRETE presents a world class range of innovative products - Sealers, Enhancers, Cleaners - that augment the appearance of interiors and exteriors while adding years to the life of stone and tiles.

WALL PUTTY

LATAFINISH® Wall Putty is the best base for internal & external paint applications with higher bond to plastered wall and eliminates the need for primer, ensuring savings of time and money.

PLASTER

MYK LATICRETE POWER PLAST™ Ready-Mix Plaster represents the next level of development as it is self curing*. A blend of carefully selected raw materials, Portland cement and graded fillers, POWER PLAST™ is easy to use and offers superior bond, compressive & tensile strength.

So go ahead, plan on innovative interiors that speak of your talent. MYK LATICRETE takes pride in partnering you in this endeavour.

*Conditions apply
**Screed**

**LATASCREED® 100**

A factory prepared blend of carefully selected raw materials, portland cement and graded fillers, it is designed for use with water and aggregates to produce high strength, water retaining and self-curing screed for interior and exterior floor applications. It meets and exceeds the requirements of National and International Standards.

**Advantages:**
- High strength
- Shock and impact resistant
- Water retaining, self curing
- No shrinkage, no cracks

**Suitable Substrates:**
- Concrete
- Cement Mortar Beds (compressive strength > 25 Mpa)
- Cement Terrazzo

**Packaging:** 25 kg bag  **Colour:** Grey

**Compliance:**
- EN 13813, as CT-C30 F5 B1 SH 50
- VOC: Practically Nil

**Coverage:**
Coverage will be based on following mix design. the grain size matrix has to be uniformly distributed up to a size of 8 mm.

(Minimum thickness: 12 mm; Maximum thickness: 70 mm)

---

**Typical coverage with 1:5 mix by weight**

- Use aggregates of larger size (up to 12 mm) for screed thickness more than 70 mm and up to 120 mm
- Approximately 8 to 10 ltrs. of water is required for an ideal mix. Adjust the water content depending on the site conditions.

**Note for Tile / Stone Installation:**
- For wet on wet system, Slurry Bond Adhesive SBA 20 is recommended
- As an alternative LATASCREED® 100 mixed with water can also be used as slurry
- For wet on dry system, a suitable thinset adhesive from MYK LATICRETE range can be used to install tiles

---

**Waterproofing**

**LATICRETE® Hydro Ban®**

LATICRETE® Hydro Ban® is a thin, load bearing waterproofing/crack isolation membrane that does not require the use of fabric in the field, coves or corners. It is a single component, self-curing liquid rubber polymer that forms a flexible, seamless waterproofing membrane. LATICRETE® Hydro Ban® bonds directly to a wide variety of substrates.

**Applications:**
- Interior and exterior
- Swimming pools, fountains and water bodies
- Shower pans, stalls and tub surrounds
- Industrial, commercial and residential bathrooms and laundries
- Spas and hot tubs
- Kitchens and food processing areas
- Terraces and balconies over unoccupied spaces
- Counter-tops and facades
- Steam rooms (when used in conjunction with vapour barrier)

**Advantages:**
- Single component
- No fabric required for joints upto 3mm
- Bonds directly to copper, steel & PVC plumbing fixtures
- Fast drying, allows for flood test in 72 hours

**Suitable Substrates:**
- Concrete & brick masonry
- Cement mortar beds
- Cement plaster
- Gypsum wallboard
- Exterior grade plywood
- Ceramic tile & stone
- Cement terrazzo
- Cement backer board

*Interior applications only. **If skim coated with LATICRETE® Latex Thin-set Mortar ***Consult cement backer board manufacturer for specific installation recommendations and to verify acceptability for exterior use.

**Coverage:** Approx. 225-250 sq. ft. per 20 ltr pail

**Packaging:** 5 ltr & 20 ltr pails

**Compliance:** Meets the following standards
- EN 14891
- ANSI A118.10
- VOC: Very Low

**LATICRETE® 9237 Waterproofing Membrane**

LATICRETE® 9237 is a roller applied, liquid waterproofing membrane for direct use under thin and thick-bed installations of ceramic tile, stone and other finishes. It is recommended for residential and commercial floor and wall installations.

**Applications:**
- Kitchens, bathrooms, swimming pools, terrace gardens etc.

**Advantages:**
- Fast and easy to install - applies like paint
- Water cleanable when fresh
- Non-flammable
- Proven history

**Suitable substrates:**
- Concrete & brick masonry
- Cement mortar beds
- Cement plaster
- Gypsum wallboard
- Exterior grade plywood
- Ceramic tile & stone
- Cement terrazzo
- Cement backer board

**Coverage:** Approx. 200-225 sq. ft. per 20 ltr pail

**Packaging:** 5 ltr & 20 ltr pails

**Compliance:** Meets the following standards
- EN 14891
- ANSI A118.10
- VOC: Very Low

**Note:** Membrane reinforcing fabric for coves, corners and broad joints is sold separately.

**Fabric roll packing:** width - 15 cm and length - 18 m to 25 m
LATICRETE® 111 CRETE FILLER POWDER

LATICRETE® 111 Crete Filler Powder is a factory prepared blend of carefully selected raw materials, portland cement and graded aggregates. It is designed for use with LATICRETE® 73 Crete Admix to produce high strength adhesive for fixing all varieties of small to large format tiles and stones. For very large format & thin tiles/stones LATICRETE® 4237 Latex admix should be used in place of LATICRETE® 73.

Applications:
Designed specially for interior, exterior floor & wall installations of all types of tiles & stones.

Advantages:
• Exceeds ANSI A 118.4 ET / 11 (EGP) & EN 12004 for C2TES1 • High strength formula & ultimate flexibility • Ideal for external facades and underwater applications

Suitable Substrates:
• Concrete • Cement Mortar Beds • Ceramic Tiles and Stones • Cement Backer Board • Concrete Masonry • Cement Plaster • Brick Masonry • Cement Terrazzo • Gypsum Wallboard (interior only)

Coverage: Approx. 55-60 sq.ft. per 20 kg bag using a ¼” x ¼” (6mmx6mm) notch trowel for a bed of 3mm.

Packaging: 20 kg bag Colour: Grey & White

Compliance: Meets the following standards
• ANSI: A118.4 ET / 11 (EGP), EN 12004 / ISO 13007 for C2TES1
• IS 15477: TYPE 2 ADHESIVE
• VOC: Practically Nil

LATICRETE® 73 LATEX CRETE ADMIX

LATICRETE® 73 is a Latex Crete Admix mixed with LATICRETE® 111 Crete Filler Powder / Adhesives to form tile setting beds. Tile setting adhesives made with LATICRETE® 73 Crete Admix provide increased flexibility, stronger bond and compression strength when compared with conventional Portland cement mortars. This increased bond strength is especially vital when installing semi and fully vitrified tiles, quarry tiles, pavers and other ceramic floor and wall tiles used in highly critical areas such as external facades, industrial plants, swimming pools and heavy traffic areas. Also provides longer potlife & working time in hot weather conditions.

Advantages:
• High flexibility • High shock and impact resistance • High compressive strength – Exceeds ANSI A 118.4 ET requirement • Ideal for bonding large format tiles and vitrified tiles.

Coverage: Approx. 55-60 sq.ft. per 5 ltrs., mixed with 20 kg bag of LATICRETE® 111 Crete Filler Powder / Adhesive using a ¼” x ¼” (6mm x 6mm) square notch trowel for a bed of 3mm.

Packaging: 5 ltr. & 20 ltr pails

Note: Can be mixed with L305/L307/L290 to enable better flexibility for external use.

LATICRETE® 73 RAPID CRETE ADMIX

LATICRETE® 73 Rapid is a specially designed Latex Crete Admix for use with LATICRETE® 111 Crete Filler Powder to make high strength, rapid setting latex fortified thin-set adhesives. Suitable for installation of all types of ceramic tiles, industrial tiles, natural stones and agglomerates.

Applications:
Excellent for facades & underwater applications, both interior & exterior areas.

Advantages:
• Ultimate bond strength. Can be used on various dry walls directly • Exceeds ANSI A 118.4 ET / 11 (EGP) & EN 12004 for C2TES1 • Excellent for underwater applications • Single component, just add water.

Suitable Substrates:
• Concrete • Concrete Masonry • Cement Mortar Beds • Cement Plaster • Ceramic Tile and Stone • Brick Masonry • Cement Backer Board** • Cement Terrazzo • Gypsum Wallboard • Calcium Silicate board*

*Interior use only **Consult the backer board manufacturer’s data sheet for the specific recommendations.

Coverage: Approx. 55-60 sq.ft. per 20 kg bag using a ¼” x ¼” (6mmx6mm) notch trowel for a bed of 3mm.

Packaging: 20 kg bag

Colour: Grey and White

Compliance: Meets the following standards
• ANSI: A118.4 ET / 11 (EGP)
• EN 12004 / ISO 13007 for C2TES1
• IS 15477: TYPE 2 ADHESIVE
• VOC: Very Low
XTRABOND FSA 336 THINSET ADHESIVE
A multipurpose polymer modified rapid drying (fast setting) thinset adhesive, suitable for new installations with low down time and quick repairs. Designed especially for moisture sensitive natural stone applications on floor and wall.

Applications:
Designed specially for interiors, exterior floor & wall installations of all types of ceramic tiles, vitreous tiles, semi-vitreous tiles, glass mosaic tiles, precast terrazzo and natural stones over concrete and a variety of substrates.

Advantages:
- High strength, polymer modified
- Fast setting (Rapid drying)
- Good working time
- Easy to use & part of MBS (Moisture barrier system)
- Exceeds ANSI A 118.4 FT

Coverage: Approx 55-60 sft per 20 kg bag with 6mmx6mm square notch trowel for a bed of 3 mm

Packaging: 20 kg & 50 kg bags

Colour: Grey & White

Compliance: Meets the following standards
- ANSI A 118.4 FT
- IS 15477 : TYPE 2 ADHESIVE
- EN 12004/ISO 13007: C2 FT
- VOC: Practically Nil

LATICRETE® 335 MULTIPURPOSE THIN-SET ADHESIVE
A multipurpose high polymer modified, thin-set mortar for interior and exterior installation of ceramic tiles, stone, quarry tiles, glass mosaic tiles, pavers and bricks. LATICRETE® 335 Multipurpose Thin-set Adhesive is designed to mix with water and has a convenient open time with high adhesion & workability. LATICRETE® 335 Multipurpose Thin-set Adhesive is compliant with EN and ANSI standards.

Applications:
Designed for exterior and underwater applications, superior bond to concrete, cement renders, screeds.

Advantages:
- Single component
- Exceeds EN 12004/ISO 13007 for C2TE S1 and ANSI A 118.4 ET
- Highly flexible yet strong on bond strength
- Suited for demanding external applications

Suitable Substrates:
- Concrete
- Concrete Masonry
- Cement Mortar Beds
- Cement Plaster
- Ceramic Tile and Stone
- Brick Masonry
- Cement Terrazzo
- Gypsum Wall Board*
- Cement Backer Board*

*Consult the backer board manufacturer’s data sheet for the specific recommendations.

Coverage: Approx 55 - 60 sft per 20 kg bag with (6mmx6mm) square notch trowel for a bed of 3 mm

Packaging: 20 kg & 50 kg bags

Colour: Grey & White

Compliance: Meets the following standards
- ANSI: A 118.4 ET, EN 12004/ISO 13007: C2TE
- IS 15477: TYPE 2 ADHESIVE
- VOC: Practically Nil

LATICRETE® 252 Ag SILVER THIN-SET ADHESIVE
A multipurpose, high polymer modified powder offering vast utility including applications for floor & wall in interior & exterior areas. It is a cementitious thin-set powder to be mixed only with water to install various types of medium & large format tiles & stone on a variety of substrates using thin-set method of installation.

Applications:
Designed specially for interiors, exterior floor & wall installations of all types of ceramic tiles, vitreous tiles, semi-vitreous tiles, glass mosaic tiles, precast terrazzo and natural stones over concrete and a variety of substrates.

Advantages:
- Polymer modified thin-set adhesive
- Exceeds ANSI A 118.4 ET
- Suitable for mosaic, and various tiles & stones
- Suitable for various substrates

Suitable Substrates:
- Concrete
- Cement Mortar Beds
- Ceramic Tile and Stone
- Concrete Masonry
- Cement Plaster
- Brick Masonry
- Cement Terrazzo
- Gypsum Wall Board*
- Cement Backer Board*

*Consult the backer board manufacturer’s data sheet for the specific recommendations.

Coverage: Approx. 55-60 sq.ft. per 20 kg bag with a 1/4” x 1/4” (6mm x 6mm) square notch trowel for a bed of 3mm.

Packaging: 5 kg, 20 kg and 50 kg bags

Colour: Grey and White

Compliance: Meets the following standards
- ANSI: A 118.4 ET, EN 12004/ISO 13007: C2TE
- IS 15477: TYPE 2 ADHESIVE
- VOC: Practically Nil

CEMENT ADDITIVE
SUPER SET
MYK LATICRETE SUPER SET is a macromolecule based polymer concentrate liquid to be mixed with water and used with cement for installing ceramic tile, vitrified tile and natural stone using the traditional cement slurry method of installation. It is very economical and works as a great enhancer for cement slurry bonding with tiles and stones removing the need for water curing.

Applications:
Can be used for interior and exterior applications on floors over concrete and mortar beds

Advantages:
- Purpose - for enhancing traditional cement slurry
- Easy to use – Liquid form easily dispersible in water
- Polymer based – High adhesion, more open time
- Better performance – Compared to traditional system of only cement slurry tiling
- Special Polymers – Self curing of cement slurry
- Economical – Highly economical to use with many benefits
- Can be used with Grey Cement or White Cement

Suitable Substrates:
- Traditional Wet on Wet system - Cement Mortar Beds

Mixing Ratio: Only 300ml to be mixed in water and used with 50 kg bag of cement

Packaging: 300ml

Colour: White liquid
**LATICRETE® 290 PREMIUM FLOOR AND WALL THIN-SET ADHESIVE**

A high performance polymer based adhesive to be mixed with water or latex for installing medium & large format ceramic tiles, vitrified tiles, marble and stone on floors and walls. Combine with LATICRETE® 73 Crete Admix for improved performance.

**Applications:** Designed for interior floor & wall areas.

**Advantages:**
- Dual purpose for floor & wall  •  Exceeds ANSI A 118.1 TE  •  Extended open time  •  High bond strength

**Suitable Substrates:**
- Concrete  •  Cement Mortar Beds  •  Existing tiling on floor & wall  •  Ceramic Tiles and Stones  •  Concrete Masonry  •  Cement Plaster  •  Brick Masonry  •  Cement Terrazzo

**Coverage:** Approx. 55-60 sq. ft. per 20 kg bag with a ¼” x ¼” (6mm x 6mm) square notch trowel for a bed of 3mm.

**Packaging:** 20 kg and 50 kg bags  •  Colour: Grey & White

**Compliance:** Meets the following standards
- ANSI: A118.1 TE
- EN: 12004/ISO 13007: C1TE
- IS 15477: TYPE 2 ADHESIVE
- VOC: Practically Nil

---

**LATAFIX 305 FLOOR AND WALL THIN-SET ADHESIVE**

A factory-made bagged cementitious polymer based powder, containing Portland cement and silica sand, it can be mixed with water for installing small and medium size ceramic floor tiles in interior areas using the thinset method of installation.

**Applications:** Designed for internal floor applications.

**Advantages:**
- Ideal for fixing ceramic tiles on floor  •  Meets ANSI A 118.1 T  •  Economy Grade  •  Smooth & Creamy.

**Suitable Substrates:**
- Cement Mortar Beds  •  Cement Plaster  •  Brick Masonry  •  Cement Terrazzo

**Coverage:** Approx. 55-60 sq. ft. per 20 kg bag with a ¼” x ¼” (6mm x 6mm) square notch trowel for a bed of 3mm.

**Packaging:** 20 kg and 50 kg bags  •  Colour: Grey

**Compliance:** Meets the following standards
- ANSI: Meets ANSI A 118.1 T
- IS 15477: TYPE 1 ADHESIVE
- EN 12004/ISO 13007: CIT
- VOC: Practically Nil

---

**LATICRETE® 307 FLOOR AND WALL THIN-SET ADHESIVE**

It is a smooth and creamy thin-set polymer based adhesive for installing small to medium format ceramic wall and floor tiles, vitrified tiles, small format natural stones in interior areas. (For improved performance and exterior use, fortify with LATICRETE® 73 Crete Admix).

**Applications:** Designed for internal floor & wall applications.

**Advantages:**
- Ideal for fixing ceramic tiles, vitrified tiles, natural stones (small format) on floor & wall  •  Exceeds ANSI A 118.1  •  Extended open time  •  Smooth & creamy

**Suitable Substrates:**
- Cement Mortar Beds  •  Existing tiles/stones on floor & wall  •  Cement plaster  •  Brick Masonry  •  Cement Terrazzo

**Coverage:** Approx. 55-60 sq. ft. per 20 kg bag with a ¼” x ¼” (6mm x 6mm) square notch trowel for a bed of 3mm.

**Packaging:** 20 kg and 50 kg bags  •  Colour: Grey

**Compliance:**
- ANSI: A 118.1
- ISI: TYPE 1 ADHESIVE
- EN 12004/ISO 13007: CIT
- VOC: Nil

---

**MYK LATICRETE offers a range of Epoxy Adhesives for special applications.**

**LATAPOXY® 300 Epoxy Adhesive**

For installing moisture sensitive marble and tiles / stone in areas with chemical exposure.

**LATAPOXY® 270 Epoxy Adhesive**

For installing stone on external facade.

**LATAPOXY® 210 Modified Epoxy Adhesive**

Full bedded modified epoxy adhesive for installing tiles / stone on plywood and fixing metal tiles on plaster wall.

**LATAPOXY® 310 Epoxy Chemical Anchor**

For installing tiles / stone on external concrete wall & metal wall by spot bonding method.
**PUA 212**

**MYK LATICRETE PUA 212**

It is a two component, modified Polyurethane Adhesive designed for the installation of ceramic tile, vitrified tile, metal tile, glass tile, agglomerates, glass mosaic tile and natural stone on any substrate. It is highly elastic, thixotropic and suitable to lay water sensitive tiles & stones on highly expandable, deformable, absorbent and non-absorbent substrates.

**Applications:**

Designed especially for interior and exterior floor and wall installations of all types of ceramic tile, vitreous, semi-vitreous tile, glass mosaic tiles, precast terrazzo, engineered stone, metal tiles and natural stones over concrete and on a variety of substrates including metal substrates and drywall boards.

**Advantages:**

- Highly flexible & superior bond strength
- Suitable for all the substrates including metal
- Good for vertical applications
- Ideal for agglomerates & moisture sensitive tiles / stones

**Suitable Substrates:**

- Concrete – VDF, Tremix and MIVON
- Concrete masonry & brick masonry
- Cement mortar beds & plaster
- Metal floors and walls
- Tile and stone
- Wood & Plywood
- Cement backer board & Gypsum board
- Cement terrazzo
- Engineered stones & marbles
- Epoxy or PU resin based substrates
- Rubber, PVC and Linoleum substrates

*Note: Consult the backer board manufacturer’s data sheet for the specific recommendations and load bearing capacity of specific board intended for use.

**Coverage:**

- 15 to 17 sq.ft per pack of 8 Kg with 1/4" x 1/4" (6mm x 6mm) square notch trowel for a bed of 3mm.
- Coverage will vary depending on trowel notch size, type and size of tile and substrate smoothness and evenness.

**Packaging:**

- 8 Kg Pail (Part A: 300 g Part B: 7.7 kg)

Factory proportioned unit consisting of two conveniently packed components - Hardener, Resin (Part A and Part B)

**Colour:** Off White

**Compliance:**

- EN: VOC: Practically Nil
- ANSI: A 118.1T
- EN: C1TE
- ASTM C 1660
- ISI: Type 1 ADHESIVE

**suitable Substrates:**

- Concrete
- Cement mortar beds
- Plywood
- Gypsum wall board
- Calcium silicate board
- Bison panel board
- Concrete masonry
- Cement plaster
- AAC Block masonry
- Cement terrazzo
- Cement backer board
- Existing ceramic tile
- Other resilient tile and stone

* All cement based surfaces should have been cured as per standard practices and shall be dry for tiling

**Note:** Not for use on metal & plastic substrates and metal tiles.

**Coverage:**

- Approximately 300 sq.ft. per 50 kg bag when used at 2mm bed thickness. Coverage is based on smoothness and evenness of the substrate, size of blocks used and the thickness of mortar used. A general guide line for coverage of mortar is given when used with 25% water added to powder.

**Note:** Coverage is based on the block size of 600mm X 200mm X 100mm

**Packaging:**

- 20 kg & 50 kg bags

**Colour:** Grey

**Compliance:**

- ANSI: A 118.1T
- EN: C1TE
- ASTM C 1660
- ISI: Type 1 ADHESIVE
- VOC: Practically Nil

**Suitable Substrates:**

- Concrete
- Cement mortar beds
- Plywood
- Gypsum wall board
- Calcium silicate board
- Bison panel board
- Concrete masonry
- Cement plaster
- AAC Block masonry
- Cement terrazzo
- Cement backer board
- Existing ceramic tile
- Other resilient tile and stone

* All cement based surfaces should have been cured as per standard practices and shall be dry for tiling

**Note:** Consult cement backer board manufacturer for specific installation recommendations and to verify acceptability for exterior use.

**Coverage:**

- Approx. 58 sq.ft. per 20 kg unit with a ¼" x ¼" (6mm x 6mm) square notch trowel

**Packaging:**

- 10 kg & 20 kg pail

**Colour:** Off White

**Compliance:**

- ANSI: A 118.4 & ANSI 136.1
- EN: D2TE
- VOC: Very Low

---

**AAC BLOCK ADHESIVE**

It is a factory prepared blend of carefully selected raw materials, portland cement and graded aggregates and polymers. Designed for use with water to produce high strength thixotropic mortar, for laying aerated light weight concrete, fly ash bricks, cement hollow blocks, cellular concrete blocks or smoothing over the block work surface in layers of upto 12mm thickness, that meet and exceed the requirements of National and International Standards.

**Applications:**

For interior and exterior use for preparing thin bed block mortar for ALC and cellular concrete blocks.

**Advantages:**

- Long working time
- No curing required after block work is done
- Improved adhesion between two blocks
- Fast & economical

**Suitable Substrates:**

- Concrete blocks
- Cement mortar blocks/bricks
- Concrete hollow blocks
- Aerated light weight blocks
- Cellular concrete blocks
- Fly ash bricks

**Coverage:**

- Approximately 300 sq ft. per 50 kg bag when used at 2mm bed thickness. Coverage is based on smoothness and evenness of the substrate, size of blocks used and the thickness of mortar used. A general guide line for coverage of mortar is given when used with 25% water added to powder.

**Note:** Coverage is based on the block size of 600mm X 200mm X 100mm

**Packaging:**

- 20 kg & 50 kg bags

**Colour:** Grey

**Compliance:**

- ANSI: A 118.1T
- EN: C1TE
- ASTM C 1660
- ISI: Type 1 ADHESIVE
- VOC: Practically Nil

**Suitable Substrates:**

- Concrete
- Cement mortar beds
- Plywood
- Gypsum wall board
- Calcium silicate board
- Bison panel board
- Concrete masonry
- Cement plaster
- AAC Block masonry
- Cement terrazzo
- Cement backer board
- Existing ceramic tile
- Other resilient tile and stone

* All cement based surfaces should have been cured as per standard practices and shall be dry for tiling

**Note:** Consult cement backer board manufacturer for specific installation recommendations and to verify acceptability for exterior use.

**Coverage:**

- Approx. 58 sq.ft. per 20 kg unit with a ¼" x ¼" (6mm x 6mm) square notch trowel

**Packaging:**

- 10 kg & 20 kg pail

**Colour:** Off White

**Compliance:**

- ANSI: A 118.4 & ANSI 136.1
- EN: D2TE
- VOC: Very Low
**STAINFREE GROUTS**

**MYK LATICRETE STELLAR™ GROUT**

It is a single component, high performance modified joint filling grout which offers excellent color uniformity, durability, stain protection, and beautiful grout joints in an easy-to-use, non-sag formula, with no hassle of mixing two packs or any other liquids like water or latex liquid.

**Applications:**

STELLAR™ Grout is best suited for Internal & External tile joints grouting of residential / commercial installations where materials must resist physical abuse, shock & chemical attack. Excellent for external swimming pool & water bodies.

**Advantages:**

• Single Component • Suitable for joints of 1.5 mm to 12 mm • Non-sag formula for floors and walls • Designed for exterior use

**Coverage:** Varies with tile size and grout width.

**Packaging:** Net Weight: 1/5th unit (1 kg); 1 unit (5 kg) pail

**Colour:** Available in a range of more than 37 colours

**LATAPOXY® SP-100 Stainfree Grout for Floor N’ Wall**

LATAPOXY® SP-100 Stainfree Grout for Floor N’ Wall is a stainfree, colour-fast, chemical resistant, 100% solid epoxy grout suitable for ceramic tiles, vitrified tiles, marble and stone, especially in stain prone areas such as kitchens and washrooms (residential and commercial installations).

**Applications:**

Kitchens, bathrooms, swimming pools, fountains, water bodies, hospitals, operation theatres, sterilization rooms, restaurants, cafeterias, light industrial applications and high traffic areas.

**Advantages:**

• 100% stainfree • Strong and durable • Uniform colour • Chemical and temperature resistant • Anti-bacterial and anti-fungal

**Coverage:** Varies with tile size and grout width.

**Packaging:** Net Weight: 1/5th unit (1 kg); 1 unit (5 kg) pail

Factory proportioned unit consisting of three conveniently packed components - Hardener, Resin (Part A and Part B) and Filler Powder (Part C).

**Colour:** Available in 10 attractive colours

**Compliance:** Meets the following standards

• ANSI: A 118.3
• EN 13888: RG2
• VOC: Very low

**SpectraLOCK® Pro Premium Grout**

LATICRETE® SpectraLOCK® Pro Premium Grout is a patented, high performance grout which offers excellent colour uniformity, durability, stain protection, and beautiful full grout joints in an easy-to-use, non-sag formula.

**Applications:**

• Residential & Institutional Kitchens • Cafeterias & Food Joints • Wash Rooms & Clean Rooms • Swimming Pools, Spa & Sauna • Hospitals, Operation Theatres, Laboratories • Schools & Education Institutes • Podium Slabs, Driveways & Atriums • Terraces & Balconies

**Advantages:**

• Easy to install & clean • Full flush joints • Doesn’t retain dirt & dust • Maximum non-sag performance

**Coverage:** Varies with tile size and grout width.

**Packaging:** Net Weight: 1/5th unit (1 kg); 1 unit (5 kg) pail

Factory proportioned unit consisting of three conveniently packed components - Hardener, Resin (Part A and Part B) and Filler Powder (Part C).

**Colour:** Available in 20 attractive colours

**Compliance:** Meets the following standards

• ANSI: A 118.3
• EN 13888: RG2
• VOC: Very low
CEMENTITIOUS GROUTS

LATICRETE® 600 SERIES UNSANDED GROUT
A carefully prepared blend of Portland cement, graded aggregates, polymer fortifiers and colour-fast pigments, it is designed for joint widths of 1mm to 3mm, for porous & absorbent type tiles, non-vitreous clay tiles, and marble & glazed wall tiles. Suitable for internal and external applications.

Applications:
Residential, commercial, external facades.

Advantages:
• For tile joints 1 - 3mm • Uniform colour • Hard and durable • Economical

Mixing Ratio: Use approx. 400 ml of water or LATICRETE® 1776 Grout Admix Plus for 1 kg of LATICRETE® 600 Series Unsanded Grout.

Coverage: Varies with tile size and grout width.

Packaging: 500g, 1 kg and 10 kg bags

Colour: Available in a range of more than 37 colours.

Compliance: Meets the following standards
• ANSI: A 118.6
• EN 13888: CG1
• VOC: Very low

SPECIALITY GROUTS

LATAPOXY® Dazzle™ Grout for Floor N’ Wall
LATAPOXY® Dazzle™ Grout for Floor N’ Wall is an epoxy grout specifically designed to enhance aesthetics and performance. It is suitable for use with ceramic tiles, vitrified tiles, glass mosaic tiles, designer tiles and natural stone.

Applications:
• Restaurants • Hotels • Kitchens • Bathrooms • Lobbies • Swimming Pools • Showrooms

Advantages:
• Good aesthetic appeal • 100% stainfree • Strong & durable • Chemical & temperature resistant

Coverage: Varies with tile size and grout width.

Packaging: Net Weight: 1/4th unit (1.25 kg); 1 unit (5 kg) pail
Factory proportioned kit consisting of three conveniently packed components - Hardener, Resin (Part A and Part B) and Dazzle Coloured Filler Powder (Part C).

Colour: Available in 10 colours and 3 finishes - Gold, Silver and Copper

Compliance: Meets the following standards
• ANSI: A 118.3
• EN 13888: RG2
• VOC: Very low

GROUT ADMIX

LATICRETE® 1776 GROUT ADMIX PLUS
LATICRETE® 1776 Grout Admix Plus is specially designed Latex Admix to be used with Sanded & Unsanded Grout.

Applications:
It improves the performance of Portland cement grouts for all types of ceramic tile, brick, marble, natural stone and agglomerate stone installations.

Advantages:
• Colour-fastness • Flexibility • Compressive strength • Shock and chemical resistance • Reduces water absorption • Easy to clean

Coverage: Varies by application.

Packaging: 200 ml, 400 ml, 5 ltr and 20 ltr pails

Compliance:
• VOC: Very low
CLENZA TC

CLENZA TC is a fast acting acid, acid based cleaner for regular cleaning of dirt and stains from tile surfaces. CLENZA TC is designed for daily maintenance of tiles. It is ideal for interior & exterior use.

- Applications:
  - Unglazed ceramic tiles
  - Glazed ceramic tiles
  - Vitrified tiles
  - Porcelain tile
  - Glass tile

- Advantages:
  - Cleans dirt and removes stains
  - Easy to use
  - Fast acting

- Coverage: Depends on the porosity of the surface.

- Packaging: 1 ltr can

Other variants available in Cleaners: ClenzaAQ, ClenzaEG, ClenzaGA, ClenzaEF & ClenzaMC

Preserva - Enhancer

Preserva enhances the natural colour of flamed, tumbled and textured stone surfaces. When combined with our range of Sealers, it preserves and enhances the original beauty of the unsealed natural stone. Preserva functions on the surface of the substrates. It penetrates into the surface and forms an invisible barrier by allowing vapour to escape. It enriches and gives a wet look to the natural colour of the stone and tile. All surfaces treated with Preserva are harder and less slippery. It is ideal for interior as well as exterior applications and recommended for Flamed Granite, Flamed Limestone, Tumbled Marble and Textured Natural Stone.

- Applications:
  - For interior & exterior applications of textured natural stone surfaces

- Advantages:
  - Nano-impregnating technology
  - Weather resistant
  - Superior coverage
  - Economical
  - Easy to use
  - U.V. resistant
  - Low VOC after 72 hrs application

- Coverage: 25 - 400 sq.ft. per litre depending on porosity of the substrate.

- Packaging: 1, 5 ltr cans & 20 ltr pail

Field Test:

It is highly recommended to perform field test to understand the absorption nature of the substrate. This will help to maximize the performance and efficiency of Preserva.

Other variant available in Enhancers: Preserva plus

MaxiSeal - Sealer

MaxiSeal is a nano-technology based impregnating sealer designed for the protection of all medium to dense porous tile/stone and grout surfaces. This product is formulated for resistance against water, alkalis, acid staining and freeze-thaw damages.

It penetrates into the surface and forms an invisible barrier by allowing vapour to escape. It keeps the natural colour of tile & stone intact. All surfaces treated with MaxiSeal are harder and less slippery. It is ideal for interior as well as exterior applications and recommended for grout, brick & masonry surfaces, granite, marble, ceramic and porcelain tiles.

- Applications:
  - For interior & exterior applications on tile and stone surfaces.

- Advantages:
  - Nano-impregnating technology
  - Weather resistant
  - Superior coverage
  - Economical
  - Easy to use
  - U.V. resistant
  - Low VOC after 72 hrs application

- Coverage: 25 - 500 sq.ft. per litre depending on porosity of the substrate.

- Packaging: 1, 5 ltr cans & 20 ltr pail

Field Test:

It is highly recommended to perform field test to understand the absorption nature of the substrate. This will help to maximize the performance and efficiency of MaxiSeal.

Other variants available in Sealers: MaxiSeal plus & MaxiSeal Aqua
LATAFINISH® Wall Putty

LATAFINISH® Wall Putty is a unique formulation of white cement and high performance chemicals and polymers which can be applied on damp as well as dry surfaces.

**Advantages:**
- White cement based Wall Putty
- White, smooth & glossy finish
- Does not allow paint to flake
- Protects paint from moisture
- Curing is not required
- Ideal for interior & exterior walls

**Coverage:**
LATAFINISH® Wall Putty covers approx. 16 to 20 sq. ft. per kg for 2 coats, maintaining a maximum thickness of 1.5 mm on smooth plaster surface.

**Available pack sizes:**
40 kg, 20 kg, 5 kg & 1 kg bags

**Compliance:**
- VOC: Very low

LATAFINISH® Wall Putty complies with International Standards and is tested as per World Renowned C.B.R.I, Roorkee.

LATAFINISH® Wall Putty - Coarse Finish is made of white cement, polymers, carefully graded fine aggregates & biocides. It has to be mixed with water at the time of application.

LATAFINISH® - Coarse Finish is used to make uneven surfaces level and smooth and is designed for both interior and exterior surfaces.

**Advantages:**
- Easy to apply
- Good compressive strength
- Water resistant
- Good tensile strength
- Anti-fungal
- Covers undulations of plastered surfaces

**Coverage:**
LATAFINISH® Wall Putty covers approx. 10 to 11 sq.ft. per kg for 2mm thickness. The coverage depends upon the quality of base surface and surface evenness.

**Available pack sizes:**
40 kg & 20 kg bags

**Compliance:**
- VOC: Very low

PRIMER

LATAPRIMER

WATER BASED CEMENT PRIMER

MYK LATICRETE LATAPRIMER is a premium quality, water-based dispersion containing acrylic polymers and selected surface activation agents, which penetrate deep into the substrate and maximize bond strength. It can be used on a wide range of substrates including Cement based plasters, gypsum based plasters, POP etc.,

**Available in Interior & Exterior grade**

**Interior grade**

**Advantages:**
- Effective in sealing pores in substrate
- Better adhesion to substrate
- Improves coverage saves paint cost

**Dilution:**
- Upto 20% dilution with water

**Coverage:**
- 80 to 100 sq.ft.*

**Packaging:**
1, 4 ltrs cans, 10 ltrs & 20 ltrs pails

**Compliance:**
- VOC: Very low

*Coverage depending upon the porosity of the substrate

**Exterior grade**

**Advantages:**
- Effective in sealing pores in substrate
- Better adhesion to substrate
- Improves coverage saves paint cost
- Withstands exterior weather conditions

**Dilution:**
- Upto 100% dilution with water

**Coverage:**
- 100 to 120 sq.ft.*

**Packaging:**
1, 4 ltrs cans, 10 ltrs & 20 ltrs pails

**Compliance:**
- VOC: Very low
POWER PLAST™ Ready Mix Plaster is a polymer modified ready to use plaster made of selected raw materials, Portland cement and graded fillers. Designed for use with water to produce superior strength, it is a water retaining & self curing* plaster that meets and exceeds the requirements of National and International Standards.

**Application:**
For interior and exterior wall plastering.

**Advantages**
- Fast & economical
- Water retaining & self curing*
- Improved bond, compressive & tensile strength
- Easy to use
- Minimum rebound losses

**Suitable Substrates**
- Concrete walls & ceilings
- Clay brick walls
- Concrete hollow brick walls
- Cement block walls
- AAC Block walls

* Additional curing may be required in extreme hot weather condition.
